

Standardized Testing Policy

Bridgewater Academy will administer all state mandated tests. Educators will take all reasonable steps to assure that standardized tests reflect the ability, knowledge, aptitude, or basic skill of each individual student taking standardized tests.

At least once a year Bridgewater Academy will provide professional development for all teachers and any other standardized test administrators concerning guidelines and procedures for test administration, including teacher responsibility for test security and proper professional practices. SCDOE Testing Ethics Policy will be used in providing this training.

Each and every test administrator/proctor shall individually sign a Testing Ethics signature page provided by the SCDOE.

All teachers and test administrators shall conduct test preparation, test administration, provide test results, and return of all protected test materials in strict accordance with the procedures and guidelines specified during the professional development training provided by Bridgewater Academy administration.

(Regulation Code 43-100; Code of Law 59-1-447)
